## SUMMARY

---

**4+ years of experience** building back-end and front-end solutions for e-Commerce, retail, and BI platforms. Skilled in *Python (Django)*, *JavaScript/TypeScript*, *PostgreSQL*, and *cloud (AWS/GCP)*, *ETL (Pentaho)*, *REST API integrations*, and *distributed systems*. Passionate about delivering scalable products that drive business results, having contributed to solutions used by major Brazilian retailers and automotive companies.

## WORK EXPERIENCE

---

### Software Engineer

2024 - 2025

**Ravpro** delivers software solutions tailored for car dealerships across Brazil. The company supplies solutions to some of the *largest car and truck dealerships in Brazil*.

- **Engineered backend and frontend features** for RavMenu Web, enhancing upselling opportunities and improving customer decision-making at high-volume dealerships.
- Developed and maintained system **integrations and ETL pipelines for real-time synchronization** of vehicle data, parts inventory, and maintenance scheduling, as well as data retrieval for *Business Intelligence (BI)* systems.
- Strengthened problem-solving skills and maintained clear, **assertive communication with team members and clients**, working within agile *Scrum* principles.
- **Stack:** *React, NodeJS, Python, PostgreSQL, MongoDB, AWS, Pentaho (ETL)*.

### Back-End Programmer (Mid-Level)

2021 - 2023

**Inteliger** specializes in **e-Commerce**, AI-powered retail solutions and Business Intelligence (BI) **systems to monitor e-Commerce sales**, inventory, and operational KPIs for **major pharmacy chains across Brazil**.

- **Served as principal developer for Amplius (BI) project** and **contributed to over 10 projects**, ranging from payment and third-party delivery integrations to developing a logging and order history system.
- Developed and maintained Inteliger's Venda Mais (Voai) omnichannel platform, **enabling pharmacies to unify e-commerce, marketplace, and telesales operations**.
- **Stack:** *Python, Django, PostgreSQL, Redis, Pentaho (ETL), Google Cloud Platform (GCP)*.

## PROJECTS

---

### TodoApp-Java (Java + Spring Boot)

[Link to Repo](#)

A CRUD Todo application implemented with Java Spring Boot, featuring RESTful APIs, JPA for database access, and dependency injection. Built as part of a multi-framework comparison (Laravel, Rails, Scotty, .NET), it highlights architectural and developer-experience differences.

## EDUCATION

---

2023 – 2026 B.Sc. in Computer Science, **Pontifical Catholic University of Paraná (PUCPR)**

2016 – 2018 Technical Diploma in Information Technology, **Brother Mário Cristóvão Vocational Education Center (TECPUC)**
